### 1.Course Overview

Universities, colleges and corporates around the globe use Bloomberg to bring the real world of finance into the classroom, providing students with access to the same information platform used by leading decision makers in business, finance and government.

The Bloomberg Professional service and Bloomberg Terminal seamlessly integrate the very best in data, news and analytics. The Terminal is a 24-hour, global financial services system that provides transparent and reliable financial, economic and government information covering all market sectors. It features company financials, market data spanning more than 20 years, charts, statistics, a communications platform and current news reports.

The Bloomberg Terminal brings together real-time data on every market, breaking news, in-depth research, powerful analytics, communications tools and world-class execution capabilities — in one fully integrated solution.

Up-to-the-minute access to the news that matters, that moves markets and that changes the course of a business can make all the difference. News is reported when it happens, from where it happens. With more than 2,700 news professionals in 120 countries, Bloomberg's award-winning coverage of companies, markets, economies, politics and governments ensures that you get the information you need when you need it most.

Bloomberg has a broad range of research offerings including direct access to sell-side and independent research from more than 1,500 sources, as well as proprietary, analyst-driven research that provides a comprehensive view of industries and their key constituents with unsurpassed depth and breadth at the sector, industry and company levels. This course is intended to provide an overview of the Bloomberg Professional service so students can get started using this powerful tool.

**Dear Sir,**

Auditorium will be fine.

We hope 150 students will register before the programme starts as they would then get the reading manual and perhaps read-up a little before the training programme.

Request you to arrange for a cordless/collar mic so that the speaker is mobile.

Regards

has successfully completed the course Introduction to Blockchain and met all the criteria for

### Blockchain Solutions Expert

certification through examination & training by Blockchain Semantics

**Issued on:** December 22, 1987

**Program Director**

## About the program

This course is designed to help students understand the basics as well as advanced aspects of the Blockchain technology whether or not they have a technical background. Participants will understand what is blockchain and how it works, its journey, applications, challenges, regulations as well as the economics involved. Participants will be ready to not just think independently about blockchain but help others along the same path.

## Student Benefits for the program

1. Free workshop-based training by Industry professionals
2. Training Material (eBooks) for each participant
3. Access to Online videos library/lectures for reference after course is completed
4. Access to Blockchain Semantics community of industry leaders and employers- industry-first employment opportunities

## Benefits to college and organizing team/faculty

1. Free participation for faculty in training
2. Certificate of Coordination after successful conduct of workshop

## Other benefits to College in Publicity & Branding

1. College can highlight that they have conducted Blockchain Certification Drive in their campus
2. College can promote that their students are Blockchain Semantics Certified to prospective employers
3. Participation in future engagements like collective Faculty Development Programme, and other events

## Duration

12 Hours

## Support required from college

Permission to interact with students for a 60-120 minutes techno commercial orientation/seminar for creating awareness about Blockchain and how this foundational technology can impact their careers.

## Basic Requirements & Support from College/Institution.

1. A Seminar hall/ Auditorium having
2. A Projector setup and public address system
3. Permission to start registration immediately after the seminar

4. Training would be conducted by instructors in-person on-campus
5. Validity of this proposal is till 30 days from the date of receiving the proposal.
6. Resource Sharing Fee if applicable will be paid to the college as communicated.
7. College will allocate a time slot suitable to all the three parties i.e. Student, College and Blockchain Semantics for conducting the batches.
8. A minimum lead time of 3 days will be provided by the college before starting of the batch.

## What is Blockchain?

Blockchain is a technology that promises to change the way we think about transactions, data storage, and data transfer. It is designed and built on the following four key principles:

1. **Replication**- Data on Blockchain is copied on every computer that is a part of Blockchain network.
2. **No Central Authority**- There is no central body which governs whether a particular transaction should be recorded or not.
3. **Irreversibility**- If a data/transaction is recorded on Blockchain, it cannot be reversed.
4. **Accessibility**- Blockchain allows anybody on this planet who is a part of the network to "read/view" any data recorded by anybody.

With these principles, one could imagine that the basics of the Internet will be rewritten.

### Example Industries that will be impacted by Blockchain:

Banking and Payments

Finance and Accounts

Supply Chain Management

Travel and Personal Transport

Networking and IOT

Insurance

Cloud Storage

Energy Management

Retail

Real Estate

Healthcare

Any Industry

## COURSE 1: INTRODUCTION TO BLOCKCHAIN AND BITCOIN

### 1. What is blockchain

### 2. The journey of blockchain

### 3. How it Works

### 4. Key Characteristics

- Decentralization
- Immutability
- Trust Network
- Timestamping
- Security
- Privacy

### 5. Applications of Blockchain

- Bitcoin and crypto currencies

Start Gas, Gas Price
- Tries in Ethereum:
  - State Trie
  - Transaction Trie
  - Receipts Trie
- Ethereum Clients:
  - Geth, eth, PyethApp
- Mining

### 2. Smart Contracts

- Brief Introduction
- Using Solidity to make smart contracts
- Data types in solidity
- Functions in Solidity
- Functions: Visibility and getters
- Functions: Modifiers
- Contracts
- Compiling and deploying Smart Contracts
- Interacting with GETH using Javascript
- Events
- Miscellaneous
- Upgrading Smart Contracts in Solidity

### 3. Introduction to Oracle services on blockchain

### 4. Using IPFS to store files on blockchain

### 5. Deploying Trade finance Dapp

## STUDENT BENEFITS

### CERTIFICATION

Certification stating your credentials as an Ethereum Developer- certified by Blockchain Semantics.

### UNDERSTANDING

Deep knowledge of developing DApps on Ethereum using Solidity.

### SAMPLE DAPP SOURCE CODE

Access to source code of a functional Trade Finance.
